ABOUT ME

BICT undergraduate at the University of Kelaniya who has independently designed and shipped 9+ full-stack applications outside of coursework, working across both the MERN and PERN stacks. Comfortable owning a project end-to-end from database schema to deployment and eager to bring that same initiative to a team while learning from experienced engineers.

KEY HIGHLIGHTS

- 1,900+ GitHub commits across 55+ public repositories
- 10+ live deployed projects
- MERN & PERN stack developer
- AI integration experience with Google Gemini

SKILLS

Languages & Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS

Backend & Databases: Node.js, Express.js, MongoDB & Mongoose, PostgreSQL, REST APIs

Tools & Platforms: Git & GitHub, Vercel, Firebase, Cloudinary, Postman, VS Code

PROJECTS

Online Food Ordering System — Team Project (MERN) *Jun 2026 – Jul 2026*

React.js, Node.js, Express.js, MongoDB Atlas, Tailwind CSS, JWT

- Collaborated in a 5-member team on a full-stack food ordering platform. Managed the GitHub repository end-to-end, including branching strategy, pull request reviews, and resolving merge conflicts across all 5 contributors.
- Built the Home and Menu pages with filtering, sorting, and real-time search, and developed JWT-based authentication.
